

LEVEL - 01

NAME: A K Selva Prabhu

REG NO: 192421224

COURSE CODE: CSA0904

COURSE NAME: PROGRAMMING FOR JAVA

The screenshot displays the SIMATS Online Programming Lab interface. At the top, there is a header with a "Secure Exit" button, the lab name "SIMATS Online Programming Lab", the subject "JAVA PROGRAMMING", and a user profile for "SELVA PRABHU A K" with ID "192421224RA". Below the header, the problem is identified as "Level 1 — Easy (E) Factors — Numbers". The problem description asks to "Find the number of factors for the given number" and provides a sample input of 100 with a sample output of 9 factors. A list of test cases is provided: 1. 343, 2. 1080, 3. -243, 4. 101010, and 5. 0. The "Your Code" section contains a Java program that uses a Scanner to read an integer 'n' and a loop to count its factors. The "Program Input (stdin)" field shows the input "100". The "Output" field shows the result "number of factors = 9". At the bottom right, there are "Run" and "Save" buttons.

Level 1 — Easy (E) Factors — Numbers

Find the number of factors for the given number
Sample Input:
Given number: 100
Sample Output:
Number of factors = 9

1. 343
2. 1080
3. -243
4. 101010
5. 0

Your Code

```
1 import java.util.Scanner;
2 class demo {
3     public static void main(String args[]) {
4         Scanner sc = new Scanner(System.in);
5         int n = sc.nextInt();
6         int count = 0;
7         for (int i = 1; i <= n; i++) {
8             if (n % i == 0) {
9                 count++;
10            }
11        }
12        System.out.println("number of factors = " + count);
13    }
14 }
```

Program Input (stdin)

100

Output

number of factors = 9

Level 1 — Easy (E) Hollow square — Loops

Write a program to print hollow square symbol pattern?
Get the symbol from user.

Your Code

```
1 import java.util.Scanner;
2 class demo{
3     public static void main(String args[]){
4         Scanner sc = new Scanner(System.in);
5         int n =sc.nextInt();
6         char s = sc.next().charAt(0);
7         for(int i =1;i<=n;i++){
8             for(int j = 1;j<=n;j++){
9                 if(i==1||i==n||j==1||j==n){
10                     System.out.print(s);
11                 }
12                 else{
13                     System.out.print(" ");
14                 }
15             }
16             System.out.println();
17         }
18     }
19 }
```

QUESTIONS

LEVEL 1 — EASY

Q1
Numbers

Q2
Loops

Q3
Strings

Q4
Array

0 / 4 submitted

Level 1 — Easy (E) Matrix Addition — Array

Write a program for matrix addition?

Sample Input:

Mat1 =
1 2
5 3
Mat2 =
2 3
4 1
Sample Output:
Mat Sum =
3 5
9 4

Your Code

```

1 import java.util.Scanner;
2 class demo{
3     public static void main(String args[]){
4         Scanner sc = new Scanner(System.in);
5         int r = sc.nextInt();
6         int c = sc.nextInt();
7         int arr1[][] = new int[r][c];
8         int arr2[][] = new int[r][c];
9         int sum[][] = new int[r][c];
10        for(int i =0;i<r;i++){
11            for(int j=0;j<c;j++){
12                arr1[i][j]=sc.nextInt();
13            }

```

Program Input (stdin)

2
2
1 2 5 3
2 3 4 1

Output

3
5
9
4
