

CO 4 AT 2

NAME: A K Selva Prabhu

REG NO: 192421224

COURSE CODE: CSA0904

COURSE NAME: PROGRAMMING FOR JAVA

1 A Simple Apple

Name: SELVA PRABHU A K

Roll No: 192421224RA

Course: B.Tech Information Technology

Applet started.

```
import java.applet.Applet;
```

```
import java.awt.*;
```

```
public class SimpleApplet extends Applet {
```

```
    public void paint(Graphics g) {
```

```
        g.setColor(Color.RED);
```

```
        g.setFont(new Font("Arial", Font.BOLD, 25));
```

```
        g.drawString("Name: SELVA PRABHU A K", 50, 80);
```

```

g.setColor(Color.BLUE);

g.setFont(new Font("Times New Roman", Font.ITALIC, 22));

g.drawString("Roll No: 192421224RA", 50, 130);

g.setColor(Color.GREEN);

g.setFont(new Font("Arial", Font.PLAIN, 22));

g.drawString("Course: B.Tech Information Technology", 50, 180);

}

}

```

2 Delegation Event Model

```

import java.awt.*;

import java.awt.event.*;

public class DelegationEventModel extends Frame
    implements ActionListener, ItemListener {

    Button button;

```

```
Checkbox checkbox;
```

```
Label label;
```

```
DelegationEventModel() {
```

```
    button = new Button("Click Me");
```

```
    checkbox = new Checkbox("Select Me");
```

```
    label = new Label("Event will appear here");
```

```
    setLayout(new FlowLayout());
```

```
    add(button);
```

```
    add(checkbox);
```

```
    add(label);
```

```
    button.addActionListener(this);
```

```
    checkbox.addItemListener(this);
```

```
    setSize(400, 200);
```

```
    setTitle("Delegation Event Model");
```

```
    setVisible(true);
```

```
}
```

```
public void actionPerformed(ActionEvent e) {
```

```
    label.setText("Button Clicked - ActionEvent");
```

```
}
```

```
public void itemStateChanged(ItemEvent e) {
```

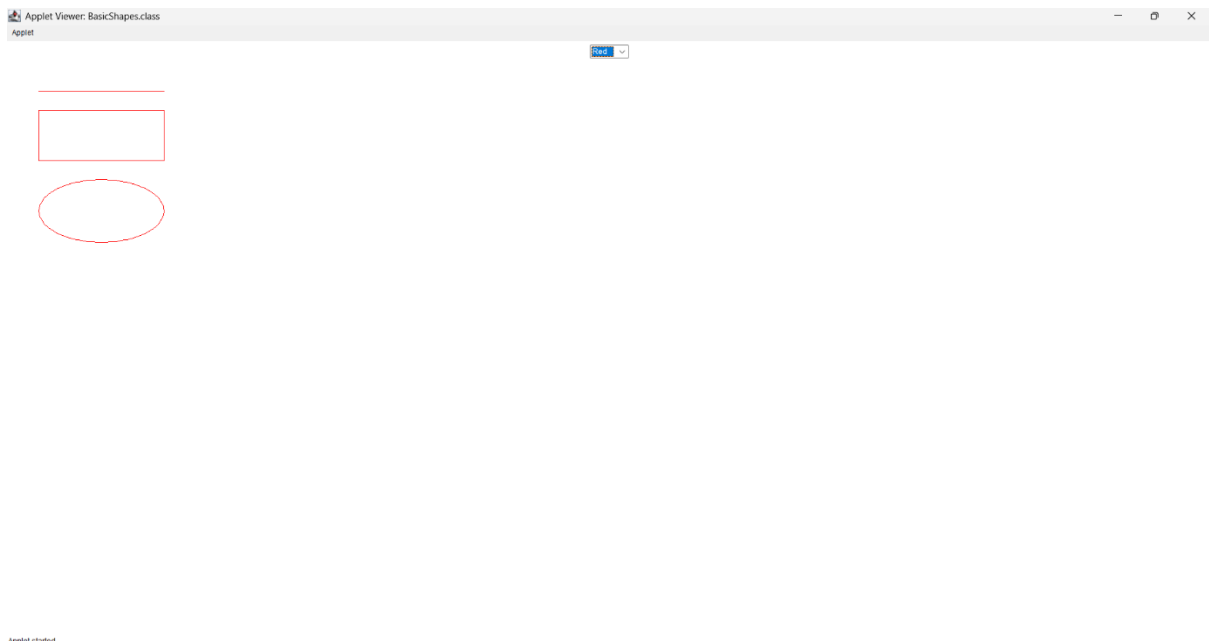

```

    if (checkbox.getState()) {
        label.setText("Checkbox Selected - ItemEvent");
    } else {
        label.setText("Checkbox Unselected - ItemEvent");
    }
}

public static void main(String[] args) {
    new DelegationEventModel();
}
}

```

3 Basic Shapes

```

import java.applet.Applet;
import java.awt.*;
import java.awt.event.*;

public class BasicShapes extends Applet implements ItemListener {

```

```
Choice colorChoice;

Color color = Color.RED;

public void init() {

    colorChoice = new Choice();

    colorChoice.add("Red");
    colorChoice.add("Blue");
    colorChoice.add("Green");

    add(colorChoice);

    colorChoice.addItemListener(this);
}

public void itemStateChanged(ItemEvent e) {

    String choice = colorChoice.getSelectedItem();

    if (choice.equals("Red")) {
        color = Color.RED;
    } else if (choice.equals("Blue")) {
        color = Color.BLUE;
    } else if (choice.equals("Green")) {
        color = Color.GREEN;
    }
}
```

```
        repaint();
    }

    public void paint(Graphics g) {

        g.setColor(color);

        // Line
        g.drawLine(50, 80, 250, 80);

        // Rectangle
        g.drawRect(50, 110, 200, 80);

        // Oval
        g.drawOval(50, 220, 200, 100);
    }
}
```

4 Find Square

```
import java.applet.Applet;

import java.awt.*;
import java.awt.event.*;

public class FindSquare extends Applet implements ActionListener {

    TextField number;

    Button button;

    Label result;

    public void init() {

        number = new TextField(10);

        button = new Button("Find Square");

        result = new Label("Enter a number");

        add(new Label("Enter Number:"));

        add(number);

        add(button);

        add(result);

        button.addActionListener(this);

    }

    public void actionPerformed(ActionEvent e) {

        int n = Integer.parseInt(number.getText());

        int square = n * n;
```

```
    result.setText("Square = " + square);  
}  
}
```
